

## DAGOGO CLINTON JUSTUS URANTA

---

214a Eti-Osa Way , Ikoyi ,Lagos | 08183763331 | [dagogouranta@gmail.com](mailto:dagogouranta@gmail.com) | gender :Male | D.O.B: 14/03/1995

### EDUCATION

#### Warwick University [2014-2018]

##### Coventry, United Kingdom

Masters in Mechanical Engineering (4 years combined honors, Bachelors Inclusive)

Obtained Grade: 2:1

#### Concord College[2012-2014]

##### Shrewsbury, United Kingdom

A levels: Mathematics(A), Physics(A), Chemistry(A), Further Math(B).

### PROFESSIONAL SUMMARY

---

- Full stack software developer with a proven ability to combine ingenuity and project management techniques to nurture a project from inception to client facing stages.
- Looking to learn and tailor my current skill set towards managing enterprise grade software.

### COMPETENCIES AND CERTIFICATIONS

- Associate Level Project Management Certification (Issued by Project and Safety Management Institute Nigeria)
- Working Knowledge of Object Oriented PHP programming and the Laravel framework.
- Thorough understanding of Responsive web design , React front end framework , Node.js runtime and Express.js backend frameworks .Proficient use of Ionic Cordova for conversion of web apps to mobile apps.
- MySQL and MongoDB database planning and operations, version control (Git) and web hosting(Heroku).

### NOTABLE PROJECTS

---

- Created a banking portal for a microfinance bank, for its members to view transactions and balances. A messaging system was also included in the web app ([www.bridgewayview.com](http://www.bridgewayview.com)) .
- Created and contributed to the design of an online marketplace for members of a microfinance bank, where they purchase food items. Partner companies upload products and receive payments via the bank.([www.bridgewayco-op.com](http://www.bridgewayco-op.com)).
- Portfolio : <https://dagogo-clinton-uranta.github.io/Dagogo-s-First-Portfolio>

### WORK AND LEADERSHIP EXPERIENCE

---

#### Software Developer - Urban Hive Ltd - November 2021 (current)

- Work with a small team of software engineers to create web applications for company use. I plan the functionality of user interfaces, business logic and database structure, from figma mockups given to me.

- Relay ideas to my team members via slack, and lead meetings where the team decides on their objectives. I then facilitate breaking these objectives down into smaller tasks via user stories on Jira(project management tool). Finally I participate in sprints, based on these user stories, to deliver reusable web components.
- Conducted training sessions for groups of students (50 students and counting) , delivering the basics of web development and programming(HTML CSS & Javascript). I structure teaching plans and devise interactive, engaging sessions for them, with the aim of registering them on our teaching platform, which I contributed in creating .
- Conducted several first stage interviews to assess interviewees' communication ability , teamwork and enthusiasm.

#### **Software Developer - BridgeWay MicroFinance Bank - February 2021 - November 2021**

- Spearheaded the development of a marketplace application for the Bank's clients., translating user requirements to functional aspects of the app, while also suggesting and implementing additional features to improve user experience.
- Was instrumental in reshaping the core functionality of the marketplace app, introducing a new formula which more accurately distributed profits and discounts between the bank and customers.
- Performed a cost-benefit analysis of different offerings for an intranet solution for the company, held meetings to assess each company's offering , and ultimately ended up building the intranet
- With limited time and resources, was able to create a mobile version of the app, shortly before release, after it was discovered that mobile phones were the primary mode of interaction with the platform

#### **Niger Insurance Plc- August 2019- June 2020**

- Assisted in the restructuring of the company's client data storage, via meticulous data-entry, research on insurance products and application of best practice.
- Was able to learn the process of, and assist in the coordination of staff training events and salary payment, allowing me to witness the importance of early planning, and gain an understanding of where to search for opportunity within an organization's structure
- Honed my customer service skills by attending to a range of clients with disputes concerning their premiums. Was able to apply active listening techniques severally, to thoroughly understand customer requests, and empathize with them where possible, to make the customer feel very well attended to while the problem was being solved.
